### **DETAILED ACTION**

This is the first Office action on the merits of Application No. 10/771,664 filed on February 4, 2004. Claims 1-44 are currently pending.

#### ***Drawings***

The drawings are objected to because in Figure 3 the bearing assembly which supports the input shaft 42 for rotation relative to the case assembly 78 should be designated "80" rather than - - 42 - -. Also, in Figure 4 the lead line associated with the reference numeral "112" at the 8 o'clock position should extend to the inwardly projecting lug.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because Figure 13 includes the reference character(s) "46A", "48A", "50A" and "52A" which are not mentioned in the description.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the reference numeral "236" mentioned in the description at line 7 of paragraph [0050].

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to because of the following informalities: In line 3 of paragraph [0031] "68" should read - - 36 - -. In line 9 of paragraph [0054] "348" should read - - 248 - -. In line 11 of paragraph [0054] "324" should read - - 254 - -. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 recites the limitation "said input and output members" in line 3. There is insufficient antecedent basis for this limitation in the claim. It is believed that this claim should depend from claim 34 rather than claim 31.

#### ***Allowable Subject Matter***

Claims 1-34 and 36-44 are allowed.

Claim 35 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Prior Art Citation***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the prior art references cited by applicant in the Information Disclosure Statement filed on March 17, 2004 has been considered. The examiner further cites Arai et al. '622, Dairokuno et al. '096, Gassmann '532, Arai et al. '365 and Dolan '879 each of which show power transmission devices.
